

AI-ENABLED SERVICE DEFINITION CANVAS

Discovery worksheet - illustrative, not an XTIUM internal document

Pittsburgh, PA - actively relocating to Tampa Bay | 412.287.8640 | russelldudek@gmail.com
linkedin.com/in/russelldudek | https://russelldudek.github.io/XTIUM/

Use

Select one service workflow. Complete the six fields with frontline, product, security and customer stakeholders. Then test it twice: inside XTIUM and in a customer environment.

1. Customer promise

Outcome, scope and exclusions

2. Trigger and context

Request, telemetry, identity, policy, inventory and history

3. AI role

Retrieve, recommend, generate, predict or act

4. Human authority

Approve, interpret, communicate, stop or roll back

5. Evidence standard

Customer value, quality, economics, trust and adoption

6. Ownership and escalation

Service, exception, improvement and customer-review owners

TWO-RUN TRANSFER TEST

Run 01 - Inside XTIUM

Actual performance, failures, overrides, controls and evidence are visible.

Run 02 - For the customer

Pattern can be explained, adapted, governed, measured and owned.

DISPOSITION

☐ Scale ☐ Adapt ☐ Hold pending evidence/ownership ☐ Stop
